Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 February 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language; or

the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1,7 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Koch'087 et al.

The Koch et al. reference discloses a fuel dispensing nozzle comprising a "housing" 80, a "valve system" 132, a "hollow cavity" containing "sound systems" 300,400 and a "flexible boot" (col. 7, lines 5-8), having a "housing" surmounted thereon proximate reference numerals 306 and 308 (see Figure 13). In regard to claim 7, the "poppet valve" associated with "valve system" 132

Art Unit: 3751

can be considered a fluid “switch” and the “valve system” 132 further activates a pressure switch 140 for automatic operation of the nozzle.

NOTE: this rejection is essentially identical to the rejection upheld by the Board of Appeals in parent application 08/515,438.

Response to Arguments

Applicant's arguments filed 2/1/05 have been fully considered but they are not persuasive. In regard to Applicant's argument that since the Board reversed Examiner on several rejections drawn to a wireless sound or video system in the flexible boot, the current claims drawn to a boot with a sound system mounted in the boot is not anticipated by Koch et al. (see paragraphs 3 and 4 in Applicant's remarks), Applicant's attention is directed in particular to claim 1 which is much broader than the patented claims and Examiner takes the position that any sound system, mechanical or otherwise, mounted within the confines defined by the boot (i.e. the hollow interior cavity defined by the boot itself) meets the present claimed subject matter and absent the particular defining limitation of a housing surmounted on the boot to house the sound system (see patented claims considered by Board) the Koch et al. reference still anticipates the currently claimed subject matter.

Allowable Subject Matter

Claims 12-23 are allowed.

Claims 2-6,8 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
